Jana MCP Server Setup for ChatGPT

Version 1.0

Date: 2026-03-24

Overview

Connect ChatGPT to Jana's environmental data platform to query air quality, emissions, and climate data using natural language.

Requirements

- ChatGPT (web or desktop)
 - Developer / Tools enabled
 - MCP support access
 - Jana account (email + password)
-

Step 1: Enable Developer Settings

1. Open ChatGPT
 2. Go to Settings
 3. Enable Tools / MCP support
-

Step 2: Add Jana MCP Server

Name: jana

Transport: SSE

URL: <https://mcp-dev.jana.earth/sse>

Step 3: Verify Connection

Ensure "jana" appears in your tools list.

Step 4: Sign In

- Browser will open
 - Log in with Jana credentials
 - Authorize access
-

Step 5: Start Using

Example queries:

- What is air quality in Toronto?
 - Show emissions in Canada
 - Analyze PM2.5 trends in Delhi
-

Notes

- Tools run automatically
 - No manual API calls needed
 - Use natural language queries
-

Troubleshooting

- Re-add server if tools not visible
 - Check internet for login issues
 - Reduce query size if timeouts occur
-

Done

You can now use ChatGPT with Jana MCP tools.
